

Supplemental User Guide

TV Backer & Solar Controller locations

Sunset Park RV strives to serve our customers the best way possible. We've created this guide out of an abundance of questions from our dealer body and customers – both present and future. Sunset Park pre-wires for solar in every trailer. Wire runs from the battery hookup in the front up to the roof, with a dedicated space to hookup a controller inside the trailer. The purpose of this guide is to show the location of where the controller should be mounted for the dealer, future customer, or Sunset Park DIYer.

The locations of the Solar Controller and TV Backers are current for the 2022 model year and may be different from past model years.

109 / 109E
